E. SESSION SUMMARY:

----The target building was perceived as a square structure of red brick construction with a flat tared roof. The windows and arches appeared offset in that white or grey brick was used to set them off from the predominant red brick construction. A neon type sign was observed in the front of the building. There was a persistent concept of the presence of a billboard located on the roof. See ENCLOSURE 1.

----The building appeared related to the presence of young people associated with a cafeteria or school.

----Items related to the building are at Enclosure 2 and include the presence of the following items: a wired (french fries?) strainer; a double sink; an oven, and a baseball-type cap. (AOL OF MCDONALD CREPT IN - THERE I LEFT THE AOL GO AND TOOK A BREAK).

----On 1 Mar 93, I re-accessed the target in a free sketch mode and received similar impressions reflected at ENCLOSURE 3.

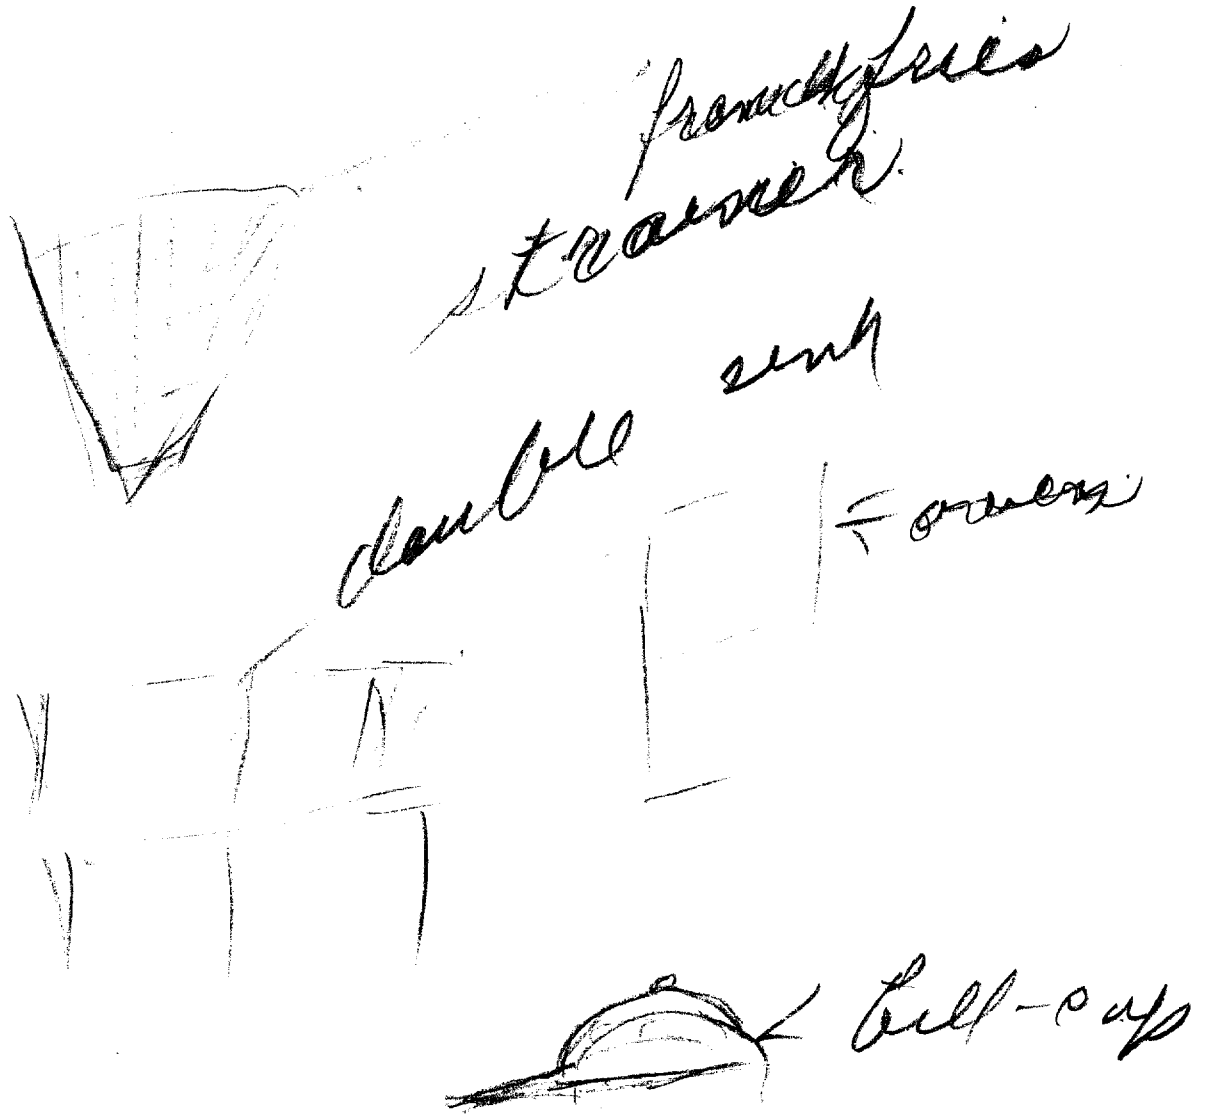

----In an attempt to obtain the most important concept directly associated with the target, the sketch of what could be a book surfaced. The sketch is at ENCLOSURE 4.

ENCLOSURE 4

Overview

* Guardian gateway, the torii entrance to Itsuku Shima Shrine shelters a sacred corner of Hiroshima Bay from the lights of change that multiply along the shore. Much of Japan wears a new face, but in many villages and island byways of the Inland Sea, the grace and traditions of the past stubbornly linger on.
